Education

Georgia Institute of Technology Atlanta, GA
Bachelor of Science in Industrial Engineering, Concentration in Data Science, GPA: 3.6 *Aug. 2021 – May 2025*

Georgia Institute of Technology Atlanta, GA
Master of Science in Analytics, Concentration in Computational Data Analytics, GPA: 3.85 *Aug. 2025 – Dec. 2026*

Relevant Coursework: Machine Learning, High Dimensional Data Analytics, Statistical Learning, Database Systems, Data & Visual Analytics

Professional Experience

Software Engineering DevOps Intern Jun. 2026 – Sep. 2026
Rivian and Volkswagen Group Technologies — Software Infrastructure, Build & Release *Irvine, CA*

- Built a Chrome extension for 200+ developers surfacing GitLab CI/CD and multi-repo operations in the browser
- Built a pre-commit hook verifying that CI ownership hooks resolve an owner at failure time across 800 critical jobs
- Extended a FastAPI backend on AWS (Lambda, SQS, Redis) to skip full pipeline runs, cutting update time 80%
- Wrote unit and integration tests for the FastAPI backend behind the extension

Cloud Data Engineering Co-op May 2025 – Dec. 2025
United Parcel Service — Enterprise Finance Services *Atlanta, GA*

- Engineered automated BigQuery health monitoring across 350+ pipelines, cutting manual diagnostics by 60%
- Designed dashboards to monitor run duration and anomalies, driving 15% reduction in monthly cloud spend
- Consolidated SQL Server metadata in GCP, enabling 30% faster system decommissioning

Business Process Analyst Intern Sep. 2024 – May 2025
Emory Healthcare Network *Atlanta, GA*

- Led cross-functional redesign of provider credentialing across 10+ departments, shortening onboarding by 25%
- Built Power BI dashboard visualizing 1,000+ provider applications to flag system bottlenecks
- Automated deadline alerts and standardized outreach templates, reducing submission delays by 40%

Projects

Admissions Prediction & Segmentation, Lake Forest College | *Python, scikit-learn* Aug. 2026 – Dec. 2026

- Engineered leakage-free features from 630K+ CRM records, flagging 4 fields that leaked the target (AUC 0.93+)
- Built k-means segments with a 200x conversion gap; top 5% of held-out prospects held 56% of outcomes (11x lift)
- Ranked 98 markets via empirical-Bayes shrinkage, finding 65% of prospects drove only 21% of conversions
- Developing XGBoost and logistic regression classifiers with SHAP for a highly imbalanced (0.3%) target

Leadership

Teaching Assistant | *Decision & Data Analytics, Stochastic Manufacturing Systems* Jan. 2024 – May 2025

- Taught 100+ students Markov chains, data mining, predictive analytics, and simulation (12 hrs/week)

Senior Finance Officer | *GT Pulse - Competitive Dance Team* Aug. 2021 – May 2025

- Oversaw $10K annual operating budget and executed $23K national competition plan with zero deficit
- Negotiated $3.5K+ in sponsorships from 100+ external partners, increasing event funding by 35%

Technical Skills

Programming & Analytics: Python (pandas, NumPy, scikit-learn, XGBoost, TensorFlow), SQL, R, JavaScript
Machine Learning & Statistics: Classification, Clustering, Feature Engineering, Model Validation, SHAP
Data Engineering: AWS (EKS, ECS), BigQuery, SQL Server, Spark, CI Tools (Bazel, Kubernetes, Docker)
Software Engineering: FastAPI, unit and integration testing, GitLab CI/CD, Git
Visualization & Tools: Power BI, Tableau, Grafana, Datadog, Splunk, GitLab, Cursor, Claude Code
